

Autumn Fire Sedum

Sedum spectabile 'Autumn Fire'

Plant Height: 18 inches

Flower Height: 24 inches

Spread: 18 inches

Sunlight:  

Hardiness Zone: 2b

Other Names: Showy Stonecrop

Description:

A very showy fall-blooming perennial with thick succulent leaves; an improvement on the popular Autumn Joy with a denser, more upright habit and deeper rose-pink flowers, highly effective in mass plantings or as a groundcover

Ornamental Features

Autumn Fire Sedum has masses of beautiful clusters of rose flowers at the ends of the stems from late summer to late fall, which emerge from distinctive coral-pink flower buds, and which are most effective when planted in groupings. The flowers are excellent for cutting. Its large succulent round leaves remain grayish green in color throughout the season.

Landscape Attributes

Autumn Fire Sedum is a dense herbaceous perennial with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Autumn Fire Sedum is recommended for the following landscape applications;

Planting & Growing

Autumn Fire Sedum will grow to be about 18 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 18 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 15 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil pH, but grows best in poor soils, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Autumn Fire Sedum is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
