Height: 18 inches

Spread: 12 inches

Sunlight: ☉ ●

Hardiness Zone: 4a

Group/Class: Dwarf Asiatic

### Description:

This variety is a compact lily that bears well formed, upward facing, bright yellow blooms, perfect for containers or massing along borders; they are also known to have multiple blooms per stem

### Ornamental Features

Tiny Bee Lily features bold yellow trumpet-shaped flowers with black spots at the ends of the stems in early summer. The flowers are excellent for cutting. Its narrow leaves remain green in color throughout the season.

### Landscape Attributes

Tiny Bee Lily is an herbaceous perennial with a rigidly upright and towering form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects
- Disease

Tiny Bee Lily is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use

## Planting & Growing

Tiny Bee Lily will grow to be about 15 inches tall at maturity, with a spread of 12 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by multiplication of the underground bulbs; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
